INSIST ON SALMO: these words are spreading from coast to coast. Salmo lures are doing what they do best—flat-out catch more fish! This product guide is packed with the newest models and colors available. Names like the Hornet, Bullhead and Chubby Darter are earning the respect of serious anglers everywhere. In fact, the Salmo Hornet was recently ranked as the 4th best walleye crankbait of all-time, and it has only been on the market for six years! Salmo continues

to amaze the fishing industry by offering the **only Lifetime Performance Guarantee** on every lure they make. The hand-built craftsmanship and factory tuning of every lure make a Salmo simply better than any other crankbait you can buy—and to prove it, every Salmo is backed with a Lifetime Performance Guarantee.

INSIST ON SALMO

Salmo Pop

Looking to get the attention of a monster bass—how about the ultimate popper from Salmo? Called the Salmo Pop, the

realistic finish and great castability of this lure is nothing without the loud and pronounced "POP" you get with a simple snap of your rod tip. Largemouth and Smallmouth bass come from miles around to attack this classic lure made even better with Salmo's desire to build the best topwater baits on the market today.

Salmo Zipper

Again Salmo has shocked the world with the "Zipper." This creative design for a lipless crankbait delivers more vibration, a louder rattle and better overall fishability than anything else in its class. The Zipper will simply trigger more fish to bite. Salmo lure designers worked overtime to create a lipless crankbait that gives the angler the control of speed and depth without losing any performance. Fast or slow, the Salmo Zipper is a fish catcher for sure.

Salmo Chubby Darter

fisherman. The Chubby Darter has been featured in many magazines. It's the most innovative lure to come along in years. The unique action of the Chubby Darter is primarily used for vertical fishing. Trout, perch, crappie, walleye and pike all fall for the Chubby Darter. More and more anglers are using the Chubby Darter in open water because it can be fished like any lipless crankbait, but sinks much slower, so you can fish it above cover much easier with the same quivering action. Simply put, the Chubby Darter can do things no other lure in the world can do.

It is hard to believe a lure that has only been sold for seven years can become a classic, but the Chubby Darter has become a "must have" among ice

Salmo Perch

The Salmo Perch has become a standard for many walleye and pike anglers as a great fish producer. The thin body shape of the Perch simulates many of the baitfish found in rivers and lakes of North America. Available in two sizes and

various actions, the Perch family can catch almost any fish in fresh and salt water. Ideal for casting with their body style and solid bait design, but trolls often find this bait has no equal for performance. One of Salmo's top sellers world-wide, the Perch is available in the 8 and the 12. The 8 has three different bills that make the Perch reach different depths. If you are casting along a shallow shoreline, the 8F is perfect. The DR or Deep Runner will reach down to 8 feet on a cast for those deeper fish, and the SDR or Super Deep Runner model will really get down deep and talk to them. The Perch 12F is a great running lure for pike, muskie and big walleye. For snapper fishing, the Perch 12 in the Real Roach pattern is a dead ringer for a saltwater mullet and history has shown us that fish can't tell the difference!

If you were to ask what is the hot new lure for pike and muskie fishing it would have to be the Slider. This is a new generation of sub-surface walking baits. With a gentle downward pull of your rod, the Slider bolts to life with a

sudden flash and glides almost 90 degrees from the angler. Another pull results in a sudden change in the opposite direction that is simply irresistible to pike, bass and muskie. Testing on bluefish, redfish, rockfish and peacock bass have also had similar results. The Slider's sub-surface, "walk the dog" action makes it one of the hottest new baits to ever hit the water. Available in both floating and sinking models and in two great sizes—the smaller size

7 for bass and the size 12 for the bigger predators.

Here is our #1 selling muskie lure for Salmo-USA. We stopped counting the number of 30 pound plus muskie caught on this bait in a single year. You can troll a Fatso super fast, or cast it out and fish it super slow. You simply can't fish this bait wrong. The side to side flash of the Fatso might be its key to success and is becoming one of the top Striper lures on the East Coast for fish over 40 pounds! There is nothing out there like a Fatso and we feel the fish show their appreciation for this fact by attacking every one they see.

Maas Marauder

When you name a topwater muskie and pike bait after the living legend Al Maas of Walker, Minnesota, then it better be right. The Maas Marauder may look something like other large "walk the dog" type lures, but looks are deceiving. First off, the size of the bait is key to triggering more fish—the Marauder is the perfect size. Hook placement is also critical to getting more successful hook-ups. Correct balance of the bait lets it ride high enough to walk easily, but at the same time float low enough in the water to make it easy for those big toothy critters to grab. Years of experience in lure design have gone into the making of the Maas Marauder. There is little doubt Salmo has raised the bar for topwater pike and muskie baits.

Salmo Jack

Looking at the Salmo Jack gets many people excited, but when you put it in the water, the gliding action of the Jack proves that looks are more than skin deep with this great pike and muskie lure. With a soft downward pull of your rod tip, the Jack comes to life and triggers big fish to strike. This effective Salmo lure is ideal for those neutral to negative fish. The Salmo Jack offers a slim body shape that delivers great hook-ups. The durable finish and solid body design will last for years of trophy fishing.

Salmo Turbo Jack

There are several topwater prop baits on the market today, but nothing can hold a candle to the Turbo Jack! The sleek design makes the Turbo easy to cast and retrieve all day long. The slim body profile will result in more hook-ups and the hard slapping tail blade lets fish know there is a new lure in town. No wood here. The super tough, high density foam body will last for years. The finish on a Salmo lure is designed to withstand the punishment of biggest teeth you can find. The Salmo Turbo Jack is a perfect example of how a superior design with superior materials can make a superior fishing lure.

The Turbo Jack Jr. is also available and offers the same loud water slapping tail in a smaller profile. Easy to cast and great dynamics in the water, the latest member of the Turbo Jack family is truly one of the most enjoyable topwater prop baits you will ever use.

Salmo Swimming Fatso

What would happen if you took a great bait design and added a lip to the front to make it swim like no other giant crankbait on the market? Why you'd be getting a strike on a Swimming Fatso, that's what! The Swimming Fatso has an action that's simply impossible to describe correctly. It wobbles, it shimmies and it pushes water like nothing you have ever seen. You can troll the Swimming Fatso in super shallow water or over thick weeds, but when you cast it, you can bring it to life in a way that almost guarantees a strike in only seconds away.

Salmo Warrior Crank

Few big game lures ever earn the respect of both trolls and casters. Each demand a level of uncompromised performance, and each will find that the Salmo Warrior Crank exceeds expectations.

Salmo's solid body design is tough, and can take the abuse any pike, muskie or bluefish dishes out. At slow speeds the Warrior Crank is easy to pull and you can cast it all day long. The unique side to side wobble of the Warrior Crank makes it capable of high speed performance while trolling without blowing out. This shallow running, large profile crankbait knows what it takes to appeal to fish and put them in the boat. Tie one on and you will not be disappointed.

Salmo Pike

The name says it all. These solid body and jointed Salmo lures are so realistic many anglers keep them for souvenirs, but don't let their good looks fool you. Big pike, muskie and almost anything with teeth love to eat baby pike! The action is a wide wobble on the big baits and a tight wiggle on smaller jointed models. If ever there was a line of baits that catches fish as good as they look, the Salmo Pike series is it!

Salmo Whitefish

It's a fact. Minnow shaped baits catch fish, and the Salmo Whitefish might catch all the fish! At least that is what many anglers who fish with them think. Cast or troll for monster walleye, pike, bass, muskie, striped, snapper or bluefish. The Whitefish can be deadly in both freshwater and salt. The Salmo Whitefish family of lures offers a large selection of versions, lip styles and configurations. Bass anglers love the large profile of the SW13 for casting. Jointed models work well at slow speeds that drive walleye crazy. The SX series with metal lips track true at speeds up to 15 MPH. The largest Whitefish, the 18, has become the ultimate "witch bait" for muskie fans. Built super strong, you will never be disappointed with the action of any Salmo Whitefish.

Salmo Skinner

When anglers first cast out a Salmo Skinner, the first words out of their mouth are, "Wow, the lure comes to life!" That is the best description for the action of the Salmo Skinner. Available in three sizes, the realistic action of the large profile Skinner and its high floatation make this bait a favorite with anglers who like to work large "witch baits" for pike and muskie. The lure so closely resembles a real baitfish that seagulls are easily fooled, so fish with care. Deadly as a trolling lure, the wide sweeping action of the Skinner really gets the

SK20F - RGS

attention of big fish. The tough, solid body design holds up well to the teeth and abuse of catching several big fish. The great action, great looks and durable construction make the Salmo Skinner one of the best big fish baits you could use this season.

Amazing... This is what most people say when they see the Giant Chubby Darter in action. This massive version of the Classic Salmo Chubby Darter is designed to be used in many applications to catch pike, muskie, striped, blue fish and dozens of other big predatory fish. You can troll it, cast it or jig it directly below your boat. There is no other lure like the Giant Chubby Darter in the world today, so don't try to even compare it with anything else on the market. The Giant Chubby Darter is totally unique, and it delivers results!

Salmo Hornet

not flimsy balsa wood or hollow plastic. The Hornet has become simply a "must have" lure in some regions of the country. In fact, during the 2006 season, demand was so high, Salmo-USA began rationing their supply so everyone got a taste of the Salmo Hornet craze. The Hornet's rod shaking action triggers fish like walleye, crappie, bass and trout. Ideal for trolling and casting with great success. By far, the Salmo Hornet is the best multi-species fish catcher you'll ever own. This is the #1 selling lure in Europe, and it will soon be #1 in America too.

Available in four sizes in the USA, the #3 Hornet is deadly on trout and panfish, the #4 has accounted for some fantastic walleye and bass numbers, and some say the #5 Hornet is the perfect size for almost any type of fishing. Many feel it is the hardest working crankbait ever designed. One thing is for sure, it does catch fish.

The largest member of the Hornet Family is the Hornet #6. Some feel it is the ultimate bass fishing crankbait. Many anglers who have fished it, know it to be of superior design and performance in the water. The signature rod shaking action of all Hornets simply drive bass crazy. The best thing you can say about the Hornet #6 is that it talks to the angler as much as it talks to the bass. Ideal for casting long distances, the Hornet #6 telegraphs every weed, rock or log you run into. Big walleyes love the Hornet too, as it has secretly become the #1 choice with many tournament anglers.

Available in floating and sinking models. Anglers will be amazed with the flexibility of fishing a sinking Hornet. Some fishing situations call for a small bait that runs deep. It is easy to fish a #5 or #6 Hornet in 25 feet of water. The smaller profile simply triggers more fish and is becoming the hottest new technique on the bass and walleye trails.

It might not look like much, but this little crankbait is totally revolutionary. Made from high density foam,

Trigger more strikes? Well, no other long body minnow bait does it like the Sting. Testing shows that the suspending models actually suspend! We are talking about not changing depth at all once it gets to a certain depth. How is this done? It's a trade secret from the Salmo lure designers, but nothing like it has ever been created! Most suspending baits drift up or down within seconds of stopping—the Sting does not move. Also available in floating models, the Sting is easy to fish and works amazingly well as a twitch bait on the surface or as a high speed trolling lure. This is one versatile and effective Salmo lure. Bass, Walleye, trout, pike and dozens of saltwater fish have fallen victim to the Sting of Salmo.

Salmo Boxer

When it comes to a chunky profile crankbait, the Salmo Boxer is ready to do the job. Largemouth bass in particular love a bait they can wrap their big jaws around. The Boxer is a great choice. It casts like a bullet, runs true every time and can walk around

stick-ups and logs with ease. Rattles come standard in two sizes and you have a choice of a shallow or deep diving models that have a realistic finish to last for years. Many anglers say it is the ugliest lure they have ever seen, but walleye, bass and pike don't care much about looks—they just attack!

Available Colors		
RC	Red Crawdad	
RPK	Real Perch	
YC	Yellow Crawdad	
RBS	Real Bass	
RR	Real Roach	

Model	Version	Length [in]	Weight [oz]	Hooks	Recommended Line [lb test]	Diving Depth cast/troll [ft]	MSRP

BX7SR	Floating	2-1/2	3/4	Two No. 1	14	3.5/6.5	\$7.95
BX7SDR	Floating	2-1/2	7/8	Two No. 1	14	8.0/16.5	\$7.95

Salmo Minnow

does exactly that. It is ideal for Trout and Crappie in the #5 and #6 sizes, and the Bass and Walleye fans will love the size and action of the #7 and #9 Minnow. The Salmo Minnow series is available in both floating and sinking models.

Don't worry about tuning the Salmo #7 SDR (Super Deep Running) minnow. Every Salmo is individually hand tuned to work right out of the package! The #7 SDR Minnow is ideal for getting down deep to those monster walleye and bass love them too! You can cast or troll this bait with equal success.

Available Colors		
T	Trout	
YB	Yellow Dace	
HP	Hot Perch

Salmo Bullhead

You would think everyone would have a Bullhead or Goby imitation, but they don't! Too bad, because Salmo knows that fish just love to eat them. Smallmouth bass, largemouth bass, walleye and trout eagerly grab the Salmo Bullhead. The unique, flat head design and shape gives the Bullhead a great wobble action for such a small profile bait. Available in floating and sinking models as well as Super Deep Runners. The only secret here is to get the Bullhead of choice down to the fish...they'll know what to do with it.

The largest Bullhead, the Bullhead 8 is a dead ringer for the Goby that has been found in the great lakes and the bass and walleye love to eat them too! The Bullhead is individually tank tested and tuned to run straight right out of the box. This is a feature of all Salmo crankbaits and is one of the many reasons Salmo lures catch more fish.

Available Colors		
YB	Yellow Dace	
LPD	Luminescent Pink Dace	
HBB	Hot Bullhead	
PT	Pink Tiger	
BB	Bullhead	
CL	Clown	
HP	Hot Perch
